Subject: government confiscation of 401s and Ira's.

I wish to express my contempt for the proposed government confiscation of the working man's 401s and IRAs. I'm retired since 2005 and I have converted my 457 retirement plan and rolled them over into two self directed IRAs. As of this time I haven't started to draw the funds from either of them. I will never give the government my money in these accounts to be substituted for worthless U.S. Treasury bonds in a government annuity program. I know your plan for the start of this program is to confiscate 401s and IRA of the people that are working. I know it is a matter of time before you take the retiree's retirement plans also. Because that is what a Communist government does. It makes the citizens depended on government on everything, from health care to a pension. Damned to hell the U.S. government.
